Functionality becomes stylish

# About the company

Founding my company HYBRO Technologies in 2010, I followed a guiding principle - every product should have three features: functionality, innovative design and the highest quality.

Today HYBRO Technologies is a leader in the production of energy efficient products in the green/climate change market.

Modern standards and production techniques insure the highest quality of our products.

We welcome you to discover our products.

A handwritten signature in blue ink, appearing to read 'Ilya Lapyshev', with a stylized flourish at the end.

Founder of HYBRO Technologies and  
designer of HYBRID and ONYX collections

# Why it is unique

The ONYX towel dryer for kitchen is the unique and patented brand new product from HYBRO Technologies. It will create the new niche of kitchen devices and become the integral part of the interior of every modern kitchen forever.

## SAFETY

Protection degree: IP55.

Water-resistant.

## INSTALLATION

Simple and fast.

## SAVING

Sensor off-timer saves your electrical usage.

## DESIGN

Ultra-thin. The thickness of each model is only 8 mm.

## FUNCTION

Kitchen towels drying and additional heating of the kitchen workspace.

## QUALITY

Official warranty – 5 years. Lifetime – more than 30 years.

## Function

The main feature of ONYX towel dryer is its drying technology, what differs from ordinary towel dryers where heat transfers through direct contact with the heater surface.

With ONYX, it is different, where the whole surface, of a glass panel is a source of thermal infrared waves, which produces the contactless transmission of heat, evenly and over the surface of towels which are in front of it. At the same time, the towel rails will remain cool to the touch.

Convection heat flow, formed between the wall and the towel dryer provides a high level of thermal efficiency.

ONYX towel dryer for kitchen combines infrared direct heating and convection heat, and is an additional source of heating for kitchen.

ONYX towel dryer is made of tempered glass. It provides high durability and safety. The heating element is evenly positioned between the glass and the case in one fully sealed unit.

Stainless steel is used to make the polished rails. Total thickness of the product is only 8 mm. The ultra-slim design emphasizes the unique style.

## 3 in 1

ONYX kitchen is a modern towel dryer, which allows you to perform three tasks at once:

- carefully dries your kitchen towels
- adds style to your kitchen interior
- heats the kitchen workspace

# Модельный ряд

## ONYX kitchen

Power	160 W
